

**PHASING NOTES:**

PERVIOUS PARKING CONFIGURATION REFLECTS SAVINGS OF APPROX. 1/3 THE COST OF BASE/PAVEMENT/CURB & GUTTER.

SIMILAR REDUCTION MAY ALSO BE AVAILABLE IN STORMWATER MANAGEMENT COST BY REDUCED IMPERVIOUS SURFACE AND ASSOCIATED RUNOFF.

A PHASING SCENARIO MAY ENTAIL PAVING OF THE CENTRAL DRIVE AISLE TO SUPPORT THE HEAVIEST TRAFFIC CIRCULATION PATTERNS, THE DAILY USE STAFF PARKING AND HANDICAP ACCESSIBLE PARKING. THIS INFRASTRUCTURE COULD BE INSTALLED TOGETHER WITH THE FULL COMPLIMENT OF STRUCTURAL STORMWATER ELEMENTS REFLECTED IN THE LONG TERM PLAN, SO AS NOT TO LIMIT FUTURE EXPANSION ABILITIES AS FUNDING BECOMES AVAILABLE.

**NOTES:**

- ① STORMWATER MANAGEMENT AREA - SLIGHTLY REDUCED FROM MINIMIZED IMPERVIOUS SURFACE
- ② SLIGHTLY REDUCED RETAINING WALL HEIGHT AS RESULT OF REDUCED IMPERVIOUS SURFACE
- ③ PAVED PRINCIPAL CIRCULATION LANE
- ④ 48 PERVIOUS PARKING SPACES WITH TIMBER BUMPER BLOCKS FOR CONGREGATION/ EVENT PARKING
- ⑤ 10 PAVED PARKING SPACES FOR DAILY USE/STAFF PARKING, AND HANDICAP ACCESSIBLE PARKING
